

Building Classroom Communities to Support AAC Users

Ashley Robinson M.S. CCC-SLP, ATP
arobinsonslp@gmail.com

everydayaac.com

Who is this for?

- AAC devices are sitting unused on shelves
- Feeling overwhelmed with AAC systems
- Don't know how to get started

Objectives

- Discuss current barriers to AAC implementation in the classroom
- Determine a starting point for effectively (and efficiently) increasing AAC in the classroom
- Create a training plan to support classroom staff to use AAC

Typical Profile

- 50% AT Professional
- 50% SLP - middle and high school
- 100% busy

My Inspiration

2014 PODD training with Gayle Porter

- “Dump and Go” model doesn’t work
- Lay the foundation
- It takes a long time to change attitudes

Our End Goal:

You can say:

what you want to say,

when you want to say it,

to **whom** you want to say it.

Step 1: Identifying Needs

| AAC Training Plan | | |
|---|---|-------------------------------|
| End Goal: Say what you want to say, when you want to say it, to whomever whoever you want to say it to. | | |
| Areas to Work On: | Short-term Goal(s) [include time frame]: | |
| Brainstorm Solutions: | | |
| <u>Action Plan:</u> | <u>Resources Needed</u> | <u>Implementation:</u> |
| | | |

Identifying Needs

Informal Conversation

Google Forms - Quizzes

Poll Everywhere (<http://www.polleverywhere.com>)

Identifying Needs

Initial Check In

Please answer the questions below to share your initial thoughts on low verbal/none verbal students in your classroom

* Required

Low Verbal/Non Verbal students in my classroom benefit from a communication system *

- YES!
- Yes, but I don't have time to implement communication systems as much as I'd like
- Students in my class have them, but we don't really use them very much in instruction.
- My low verbal/nonverbal students communicate effectively without additional communication systems
- I don't have low verbal/non verbal students in my class
- Other:

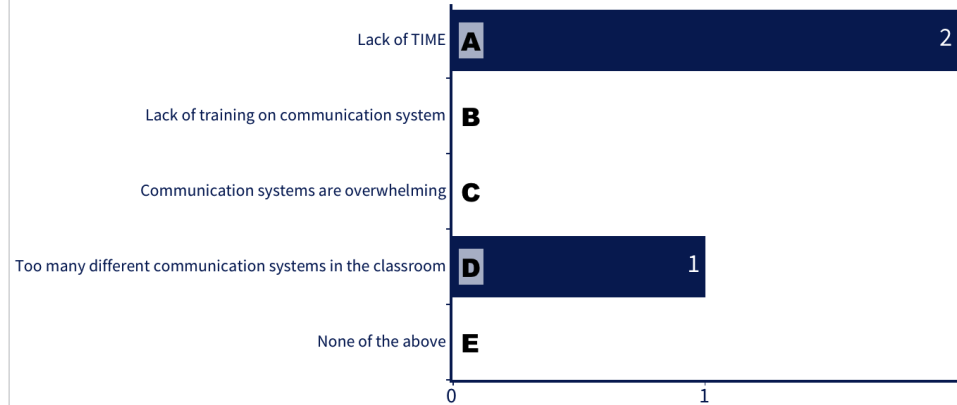

The GREATEST barrier to using communication systems in the classroom is: *

- Lack of TIME
- Lack of training on communication systems
- Communication systems are overwhelming
- Too many different communication systems in the classroom
- I use communication systems effectively for my students
- Other:

Submit

SMART link
The GREATEST barrier to using communication systems in the classroom is:

Respond at [PollEv.com/ar006](https://poll-ev.com/ar006) Text **AR006** to **37607** once to join, then **A, B, C, D, or E**

powered by Poll Everywhere

Live Audience Polling

The Data Shows:

- **School employees are SWAMPED**
 - Lack of resources, knowledge, and time to support low verbal/non verbal students
- **Lack of consistent use of AAC**
 - across the day
 - from year to year
- **Where to start?**
 - Student refusal to use systems

More Information...

Federal Laws:

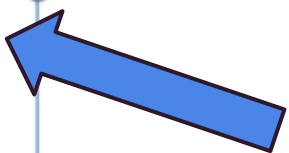

- IDEA
- Title II of the Americans with Disabilities Act of 1990
- Section 504 of the Rehabilitation Act of 1973

Review: What We Know

AAC Systems Should Be:

- present
- consistently organized
- modeled
- recognized as a voice
- useable across contexts

Brainstorm Possible Solutions & Goals

| AAC Training Plan | | |
|---|--|--|
| <p>End Goal: Say what you want to say, when you want to say it, to whoever you want to say it to.</p> | | |
| <p>Areas to Work On:</p> <ol style="list-style-type: none"> 1. AAC is not being used by all team members across the day 2. AAC is not consistent from year to year 3. Staff need more training 4. No time to implement communication systems 5. Where to start? | <p>Short-term Goal(s) [include time frame]:</p> <p>By January 30th 2015, all system level teachers will have consistent resources to assist in instruction and implementation of core vocabulary including:</p> <ul style="list-style-type: none"> • 1 large core 40 word board (with Velcro) • 2 smaller direct select boards |  |
| <p>Brainstorm Solutions:</p> <ol style="list-style-type: none"> 1. All staff needs to be on the same page about AAC 2. Need to implement evidence based practices when selecting AAC 3. Provide foundational training on AAC 4. Give teachers something they can do NOW 5. Start with what's available - first 40 | <p>By the June 12th 2015, all system level teachers in the district will:</p> <ul style="list-style-type: none"> • Be provided with training to... <ul style="list-style-type: none"> ○ Increase positive attitudes about AAC ○ Understand the importance of core vocab ○ Understand and begin to implement ALI with AAC users | |
| <p>Action Plan:</p> <ol style="list-style-type: none"> 1. Design board using core 40 vocab to send to printer | <p>Resources Needed</p> <p>http://www.med.unc.edu/ahs/clds/resources/core-vocabulary</p> <p>Money for printing</p> | <p>Implementation:</p> <p>Write grant to pay for printing</p> <p>Design board</p> |

Staff Training

Key Stakeholders

- Front line of defense
- More in depth & frequent training

Introductory Level

- Basic level training
- Extended training through key stakeholders

Training Topics

Key Stakeholders

1. Myths & Misconceptions
2. Core Vocab
3. Aided Language Input/Modeling
4. Goal Writing/Data Collection

Introductory Level

1. Myths and Misconceptions
2. Core Vocab Intro
3. Aided Language Input/Modeling Intro

Myths and Misconceptions

Get everyone on the same page:

- AAC does not harm speech development
- There are no prerequisites for AAC use
- Students do not need to immediately use AAC to mean it's working
- A student is never too old for AAC
- You do not know what someone wants to say

Language Stealers

YouTube: Language Stealers

Aided Language Input

Also known as:

- Aided language stimulation
- Partner-Augmented Input
- Natural Aided Language
- Aided Language Acquisition

Aided Language Input

What is it?

- Good Video from PrAACtical AAC:

<http://practicalaac.org/video/aac-teaching-begin-with-aided-language-input/>

- From the AAC Institute:

“Aided language stimulation (ALS) is a communication strategy, where a communication partner teaches symbol meaning and models language by combining his or her own verbal input with selection of vocabulary on the Augmentative and Alternative Communication (AAC) system. This is done by simultaneously selecting vocabulary on the AAC system and speaking.”

Aided Language Input

Following slides include information gathered from Linda Burkhart's handout from her presentation at the 2014 ATIA Conference in Orlando.

Practical Strategies for Implementing Aided Language Stimulation

http://www.lburkhart.com/handouts/Implementing_aided_lang_14.pdf

Aided Language Input

Linda Burkhart Basics:

- Talking to the student using the device
 - Students need to be talked to in their language!
- **No demands on students**
- We need to create an appropriate environment

Aided Language Input

Getting Started:

- Pick 1-4 core vocabulary words to model *across the day*
- Follow the student's lead
- Try to match what our student is already communicating with body language/
gestures/unconventional communication...
- Shut up and wait

Aided Language Input

Reminders:

- Model multiple communication functions in multiple contexts
- Modeling = prompt/cue
- **KEEP IT NATURAL!!!!**

Aided Language Input

Do This:

- Model the target

“I want _____”

- Model with no expectations
- Model in natural contexts

Not That:

- Only ask questions

“Do you want _____?”

- Move through prompt hierarchy
- Model in contrived situations

Intervention

Inclusive therapy

Child Directed

Peer Modeling

Goal Writing - for Key Stakeholders

Following information gathered from another amazing handout from Linda Burkhart & Gayle Porter's 2012 ISAAC presentation:

Assessing During Instruction: Measuring REAL Success for Communication

<http://www.lburkhart.com/handouts/Assessing%20during%20ISAAC%202012%20handout.pdf>

Goal Writing

Focus on receptive input first

- learn the power of the system

No Testing/Drill

- goals can't be too prescriptive

Focus on *appropriateness* of communication

Goal Writing - Getting Started

We are focusing on aided language input

Goals should focus on the student *increasing attention* to ALI

- with models
- in different contexts
- what support is needed to facilitate attention

Goal Writing - Getting Started

Customize an Attention Scale for that Student

| Johnny Appleseed 2014-2015 IEP Data | | | | | |
|--|--|--|--|---|--|
| Date / Conext | # Opportunities Presented (someone uses communication system to talk to Johnny) | # of symbols in message | # of symbols Johnny attended to | Attention Scale 1. No attention 2. Looked in general direction of board 3. Looked Towards individual symbols 4. Touched the board 5. Intentional Selection following a model 6. Spontaneous Initiation | Overall Total (# of symbols attended to/# symbols modeled |
| | | | | | |
| | | | | | |

IEP

Think outside the formula “3 times per week for 30 minute sessions”

Schedule sessions per quarter/semester/year

- front-loading, teach/observe/teach

RSSD to capture time spent with staff

Implementation: Think Outside the Box

- **Powerpoint Recording**
- Video a training
- Blog
- Google Sites

Next Steps

- Get TEACHER input!!!
- Gathering materials to support vocabulary instruction of first 40 word
- Video Bank for models ALI
- Continue individualized AAC evaluations
